

PHOTO 5

Southern property edge marked by the tree line in the background. Drainage area shown by (*Juncus effusus*) plant species.

PHOTO 6

Riparian woodland dominated by Oregon ash. Located in the tree canopy is a red-tailed hawk (*Buteo jamaicensis*) nest.

PHOTO 7

View looking south of the central drainage that runs diagonal through the property.

PHOTO 8

Northeastern corner of the property showing a ponded area. Numerous pacific chorus frogs and (*Hyla regilla*) some western long-toed salamanders (*ambystoma m. macrodactylum*) are present.
